ORIS TRACC: FOR UP TO 3 BIKES

**THE TOWBAR CARRIER FOR THE COMFORTABLE
AND SAFE BICYCLE TRANSPORT**

 Now available

HAPPY END FOR YOUR BIKES

••••• Top marks for quality and comfort

The ORIS TRACC bike carrier is suitable for transporting a maximum of two e-bikes or pedelecs on the towbar. With the optional extension, a third bicycle can also fit on the rack. The extension is simply plugged in and screwed tight, the TRACC can also be folded up very compact. In the bag, it can not only be stored in the boot, garage or basement to save space, but can also be neatly attached to and removed from the towbar.

The ORIS TRACC is available in two versions: for the patented adapter solution FIX4BIKE and for conventional towbars. The bike rack is very strong and extremely stable. This is ensured by high-strength steel and aluminum connections of the load-bearing components. E-bikes and pedelecs can also be transported.

The halogen lighting system is modern, durable and integrated into a UV, heat and cold-resistant plastic cladding. With the folding mechanism using the foot pedal, access to the boot is possible at any time, even if the carrier is loaded with bicycles. The bikes can be mounted on the trailer hitch in seconds using the quick release system.

Robust frame holders fix the bikes securely and also protect them from theft. An access ramp is optionally available for easy and effortless loading with e-bikes or pedelecs. There are also extra long ratchet straps as accessories for bikes with large frames.

Expanded quickly!

The ORIS TRACC is ready for a third bike in just a few simple steps: plug in the extension and screw it tight. And let's go!

BICYCLE RACK FOR THE TOWBAR

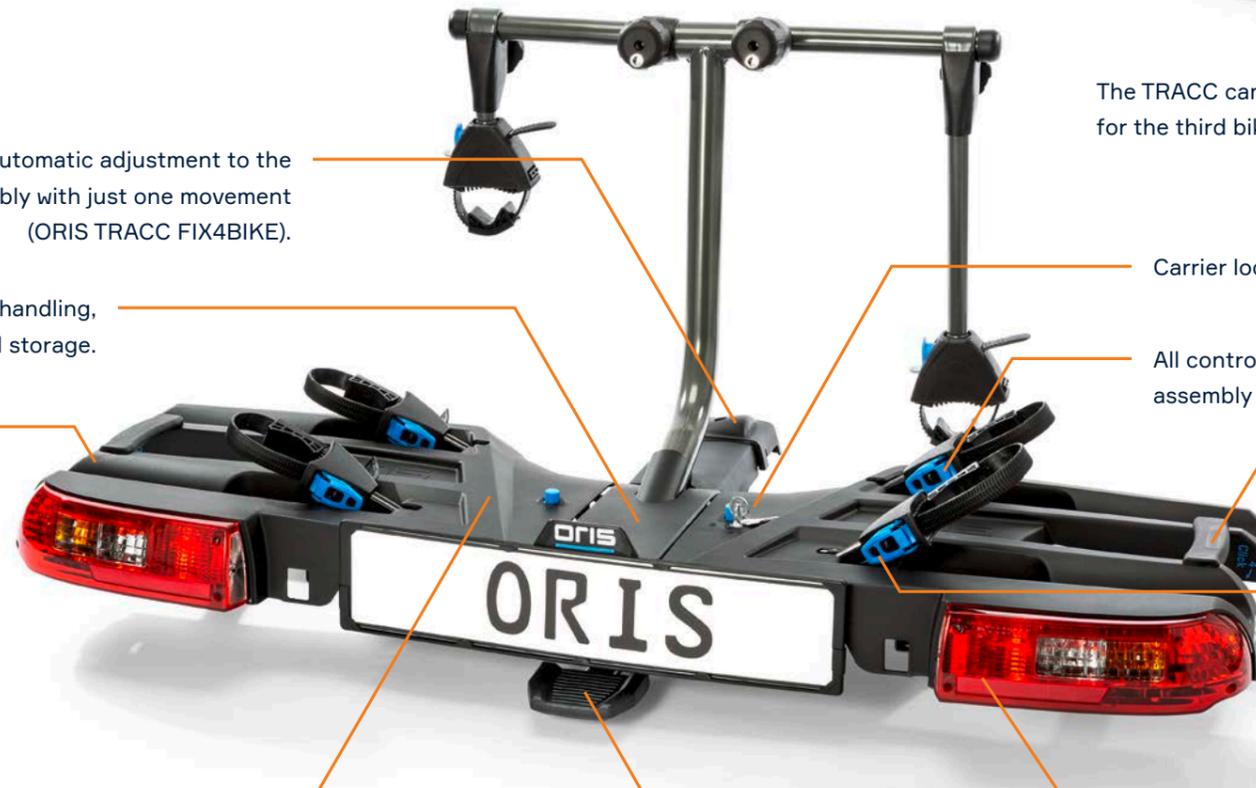

ORIS TRACC for 1,2,3 bikes

Storage bag is included.

The TRACC can also be folded up with the extension for the third bike and stowed in the bag.

Individual re-tensioning and automatic adjustment to the towball (ORIS TRACC). Assembly with just one movement (ORIS TRACC FIX4BIKE).

Completely foldable for convenient handling, assembly and storage.

Large distance between the rim holders for "smooth" transport.

Carrier lockable on the vehicle.

All control elements are colored blue. No assembly step is overlooked.

Ergonomic transport of the carrier thanks to integrated handles.

Rim straps with ratchet function.

High load capacity for the transport of e-bikes and pedelecs.

Modern lighting design

Folding mechanism with foot pedal for easy access to the boot, even when the carrier is loaded.

Part number: 790-029

Foldable loading ramp

Part number: 790-019

Put on, unfold, fasten bicycles, load luggage, done!

SAFE AND SECURE CONNECTION

Tested according to the highest safety standards

ORIS TRACC FIX4BIKE: For FIX4BIKE towbars

FIX4BIKE

With the FIX4BIKE fastening system, the bike rack can be mounted with just one movement. It no longer needs to be aligned and always remains in its horizontal position. While the FIX4BIKE carrier only fits on a FIX4BIKE towbar, the FIX4BIKE towbar is compatible with all conventional bicycle carriers.

ORIS TRACC: For every towbar

1st step

The fixation of the folded carrier is attached to the ball.

2nd step

Lock the flap and position the carrier.

3rd step

Now press the right side part of the bike rack down several times. This is how the fixation stretches onto the towball.

ORIS TRACC AND TRACC FIX4BIKE

Top class bike carriers!

Technical specifications
